EDUCATION

Vellore Institute of Technology
B.Tech, Department of Computer Science and Engineering

September 2022 – Ongoing
CGPA: 8.35

Delhi Public School, Kalyanpur, Kanpur (CBSE)
Class XII Central Board of Secondary Education
Class X Central Board of Secondary Education

March 2020 – June 2022
Percentage: 89.2%
Percentage: 88.4%

PROJECTS

CareerQuill [[GitHub](#)] [[Demo](#)]
Resume Generation & ATS Scoring Platform

August 2025 - September 2025

- Developed a web platform that lets users create resumes from 6 customizable templates through a guided form, with export support in PDF and DOCX formats while preserving layout fidelity.
- Built a resume evaluation module that generates a job-description match score and suggests keyword improvements for stronger targeting.
- Set up user authentication and a personal dashboard using Node.js, Express, MongoDB, and JWT, allowing users to securely store and manage up to 5 resume versions.
- Connected a React.js and Tailwind CSS frontend with a Python microservice via REST API to handle ATS scoring requests within 5–7 seconds.
- Established a document generation pipeline to consistently produce well-formatted PDF and DOCX outputs during development and testing.

Tech Stack: React.js, Tailwind CSS, Node.js, Express, MongoDB, JWT, REST APIs, Python, FastAPI, spaCy, scikit-learn

FlowMind-AI [[GitHub](#)] [[Demo](#)]
No-Code Platform for Visual Workflow Design and Execution

September 2025 – October 2025

- Designed an interactive workflow builder using React.js and React Flow, allowing users to visually compose and configure pipelines through drag-and-drop components.
- Assembled a document search pipeline with PyMuPDF, SentenceTransformers, and a vector database, validating result relevance through 30+ manual query tests.
- Integrated an API-driven response system using the Google Gemini API, supporting fallback searches via SerpAPI and maintaining sequential user queries within a single session.
- Created a FastAPI backend to manage orchestration, validation, and storage, and added user authentication using Node.js, Express.js, MongoDB, and JWT.
- Applied tiered access controls limiting free users to three workflows, with backend checks to enforce usage limits and support controlled feature expansion.

Tech Stack: React.js, React Flow, Node.js, Express.js, FastAPI, MongoDB, JWT, SentenceTransformers (all-MiniLM-L6-v2), SerpAPI, PyMuPDF, REST APIs, Google Gemini API

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, HTML, CSS, Typescript

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, FastAPI

Databases: MySQL, MongoDB

Web Technologies: RESTful APIs, JWT Authentication, Responsive Design

Tools: Git, GitHub, Postman, VS Code, MongoDB Atlas, Render, Vercel

CS Core: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Networking

ACHIEVEMENTS

- Placed among the top 15% performers out of 10,805 students on the GeeksforGeeks Coding Portal at VIT University.
- Curated a synthetic dataset of 1,100 job descriptions across 55 roles; trending **#1** on Kaggle NLP category with **11K+** views and **2K+** downloads ([Kaggle Link](#)).

CERTIFICATIONS

- Postman API Fundamentals Student Expert
