## PROJECTS

**CareerQuill** [\[GitHub\]](#)  
*Resume Generation & ATS Scoring Platform*

**August 2025 - September 2025**

- Developed a web platform enabling users to create resumes from 6 customizable templates via a guided form, with export options in PDF and DOCX formats while preserving layout fidelity.
- Implemented an NLP-based ATS scoring feature using Python, spaCy, and scikit-learn to compare resumes against job descriptions and suggest relevant keywords.
- Built authentication and a personal dashboard with Node.js, Express, MongoDB, and JWT, allowing each user to securely store and manage up to 5 resume versions.
- Integrated React.js/Tailwind CSS frontend with a Python microservice via REST API to process ATS scoring requests within 5–7 seconds under normal usage.
- Configured the document generation system with pdf-lib and docx, tested for consistent resume production during development.

**Tech Stack:** React.js, Tailwind CSS, Node.js, Express, MongoDB, JWT, Python, FastAPI, spaCy, scikit-learn, pdf-lib, JSON

**No-Code AI Workflow Builder** [\[GitHub\]](#)  
*Visual Platform for Intelligent Workflow Creation*

**September 2025 - October 2025**

- Built a no-code platform that allows users to visually create AI workflows by connecting modular components for queries, knowledge retrieval, and response generation.
- Added document processing with PyMuPDF and semantic search via Gemini Embeddings and ChromaDB, tested on 7 sample documents per workflow.
- Integrated Gemini LLM and SerpAPI to provide context-aware responses in a chat interface, handling up to 3 follow-up queries per session.
- Built backend services in FastAPI for workflow validation, orchestration, execution, and storage, with PostgreSQL storing data for 5–10 workflows per user.
- Implemented a freemium model limiting users to 3 workflows, enabling potential premium feature rollout.
