EDUCATION

Vellore Institute of Technology <i>B.Tech, Department of Computer Science and Engineering</i>	September 2022 – Ongoing CGPA: 8.35
Delhi Public School, Kalyanpur, Kanpur (CBSE) <i>Class XII Central Board of Secondary Education</i> <i>Class X Central Board of Secondary Education</i>	March 2020 – June 2022 Percentage: 89.2% Percentage: 88.4%

PROJECTS

CareerQuill [GitHub] [Demo] <i>Resume Generation & ATS Scoring Platform</i>	August 2025 - September 2025
---	-------------------------------------

- Developed a web platform enabling users to create resumes from 6 customizable templates via a guided form, with export options in PDF and DOCX formats while preserving layout fidelity.
- Implemented a resume-job description matching module using Python libraries to analyze keyword and semantic relevance and suggest role-specific improvements.
- Implemented JWT-based user authentication and a personal dashboard using Node.js, Express, and MongoDB to support isolated user sessions.
- Integrated a React.js/Tailwind CSS frontend with a Python microservice via REST APIs to process resume-JD analysis requests with consistent response times during development testing.
- Configured the document generation system with pdf-lib and docx, tested for consistent resume production during development.

Tech Stack: React.js, Tailwind CSS, Node.js, Express, MongoDB, JWT, REST APIs, Python, FastAPI, pdf-lib, docx

FlowMind-AI [GitHub] [Demo] <i>No-Code Platform for Visual Workflow Design and Execution</i>	September 2025 – October 2025
--	--------------------------------------

- Designed an interactive workflow builder UI using React.js and React Flow, enabling users to visually compose and configure pipelines through drag-and-drop components.
- Processed documents with PyMuPDF and enabled semantic document retrieval using text embedding-based similarity search over uploaded documents, delivering consistently relevant results across multi-document workflows.
- Implemented automated response generation with a controlled external search fallback when user queries extended beyond the uploaded document context.
- Built FastAPI backend for orchestration, validation, and storage, and implemented user authentication with Node.js, Express, MongoDB, and JWT.
- Added tiered access control logic restricting free users to three workflows, with backend validation to enforce usage limits and support controlled feature expansion.

Tech Stack: React.js, React Flow, Node.js, Express, FastAPI, MongoDB, JWT, PyMuPDF, REST APIs

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, FastAPI

Databases: MySQL, MongoDB

Web Technologies: RESTful APIs, JWT Authentication, Responsive Design

Tools: Git, GitHub, Postman, VS Code, MongoDB Atlas, Render, Vercel

CS Core: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Networking

ACHIEVEMENTS

- Secured a Top **16%** university-wide rank (1,689 / 10,754) on the GeeksforGeeks Coding Portal at VIT University.
- Curated a synthetic dataset of 1,100 job descriptions across 55 roles; trending **#1** on Kaggle NLP category with **11K+** views and **2K+** downloads ([Kaggle Link](#)).

CERTIFICATIONS

- Postman API Fundamentals Student Expert
